

VR5 HEADLITE™

The finest in hands-free lighting!

Delivering constant brightness
for the entire life of batteries.

LIGHTING THE WAY FOR PROFESSIONALS

Pros who know lighting choose HEADLITE

For over 25 years, U.S. Forest Service firefighters have been using our HEADLITE to help light the way under the most extreme conditions. U.S. Navy Damage Control Officers (DCOs) have also been using the HEADLITE for shipboard use — for over 15 years. Other demanding users include fire and EMS professionals; search and rescue teams; utilities and public services departments; manufacturing companies; maintenance and repair operations.

- Built-in microprocessor regulates the voltage which enables the batteries to deliver a **constant level of brightness**, with no dimming until the very end.
- Under laboratory and field testing at the brightest illumination level, the HEADLITE produced **constant illumination for over eight hours**.
- Our unique, **impact resistant battery pack** design provides polarity protection and eliminates the need to alternate the polarity of batteries in the pack.
- **Multiple switch-controlled light output levels** allow users to balance their needs for brightness vs. burn time.
- Voltage regulator permits a “soft start” to help **prolong bulb life**. (Most filament wear occurs when the light is turned on.)
- The reflector assembly provides a tight **shadow free beam**, variable focus, and 70% more light output.
- Software embedded in the voltage regulator produces a **light pulse advance warning** that the batteries will shortly reach their safe and useable drainage cutoff level.
- Our **water resistant design** will keep your HEADLITE operating even under adverse conditions.

**IF YOUR JOB - AND MAYBE EVEN YOUR LIFE - DEPENDS
ON THE QUALITY OF LIGHT YOU USE, THEN YOU NEED THE
HANDS-FREE HEADLITE FROM LIGHTING PRO TECHNOLOGY.**
